SAP's Acquisition Intent

LeanIX

SEPTEMBER 7, 2023

SAP to Acquire LeanIX, Delivering Customers a Comprehensive Solution Suite for Continuous Business Transformation and a Foundation for AI-Enabled Process Optimization

WALLDORF and BONN, Germany — Sept. 7, 2023 — SAP SE and LeanIX GmbH today announced that SAP has entered into an agreement to acquire LeanIX, a leader in enterprise architecture management (EAM) software. The planned acquisition helps SAP expand its business transformation portfolio, giving customers access to the full suite of tools required for continuous business transformation and facilitating AI-enabled process optimization. LeanIX, a privately held company, has been a strategic partner of SAP and for SAP® Signavio® solutions for 10 years. Many CIOs rely on LeanIX's offerings as part of their digital transformation with the RISE with SAP solution.

The transaction is expected to close in the fourth quarter of 2023, subject to customary closing conditions and regulatory approvals. Terms of the transaction were not disclosed.

With the intended acquisition, SAP is extending its comprehensive transformation suite to help customers navigate change more easily and permanently improve

What’s hard about tech stack management for architects and engineering managers?

LeanIX

- Missing transparency and oversight which technologies are actually in use
- Risk of exposure to vulnerabilities
- Old versions of major technologies are still in production
- Many technologies deployed for the same purpose without clear reasons (technical sprawl)
- No clear process established to manage technology assessments

Engineers and architects join forces to understand the current tech stack

LeanIX

1. Integration

2. Discovery of languages & frameworks

3. Context in VSM

4. Synchroni-zation to EAM

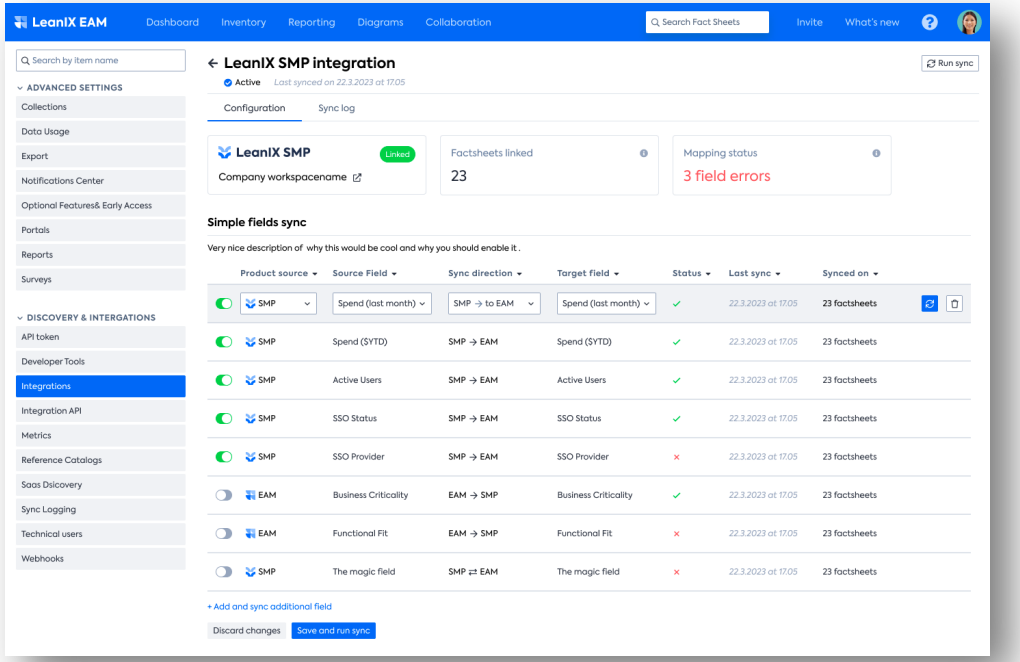
SMP outlook

Integrating with EAM

Focus 2023

An integrated ecosystem with customizable data exchange is key for a well maintained Application portfolio!



SaaS Discovery

Focus Q4

Automated discovery is mandatory to create accurate inventories in the ever-growing complexity of today's time.

Meta Model V4

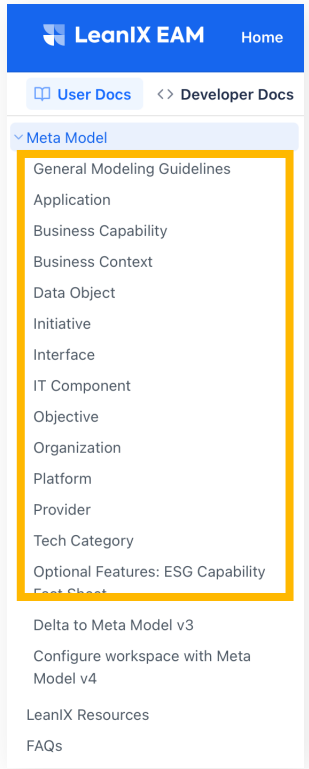
Evolved Meta Model available

- In new workspaces
- Existing workspaces remain on V3
- Further product support to make it easy for you to follow the last version in 2024
- Apply Meta Model changes manually when you've identified benefits for specific use cases

Link to documentation

Revised user docs published

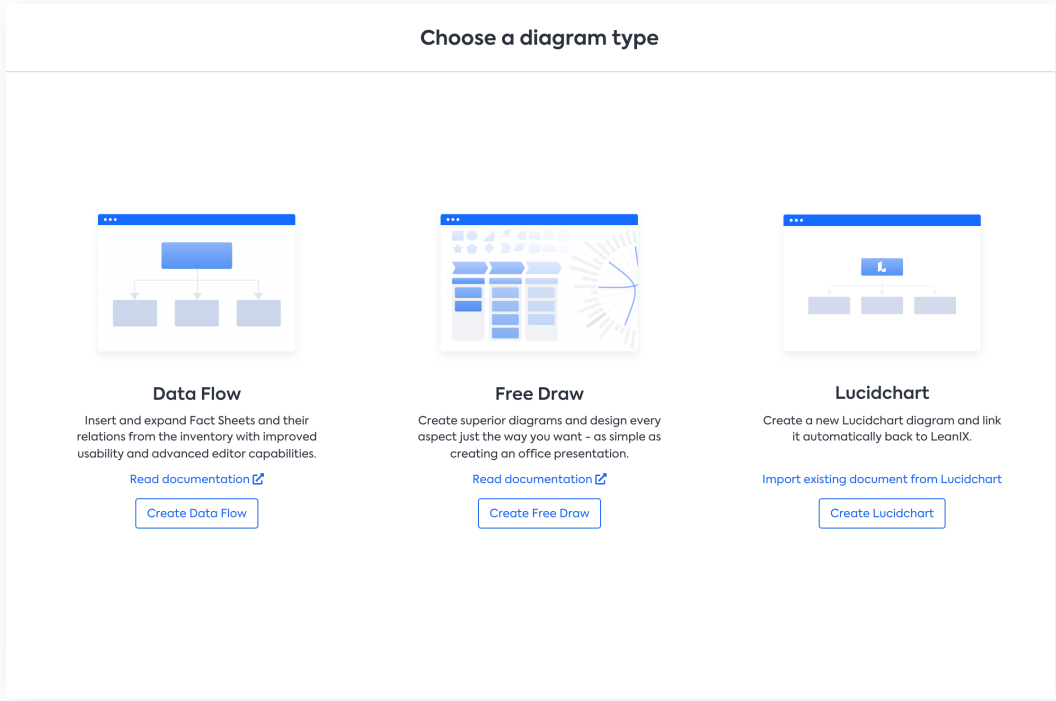
- General modeling guidelines
- Detailed descriptions, examples, best-practices for each Fact Sheet type
- Dedicated page describing the delta between V3 and V4
- Step-by-step guide to configure V4 changes



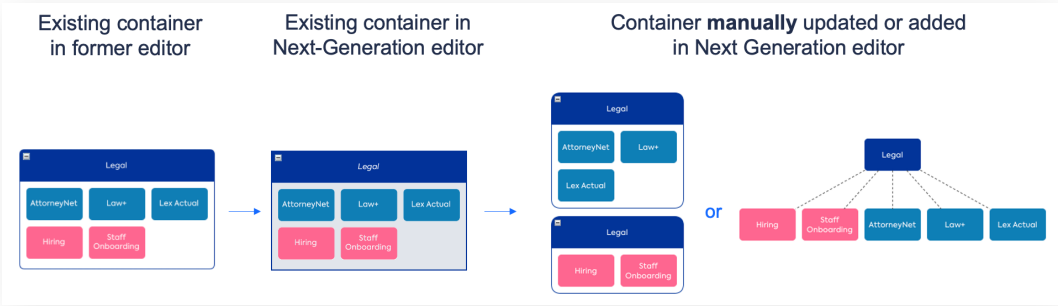
Next-Generation Diagrams transition finished

LeanIX

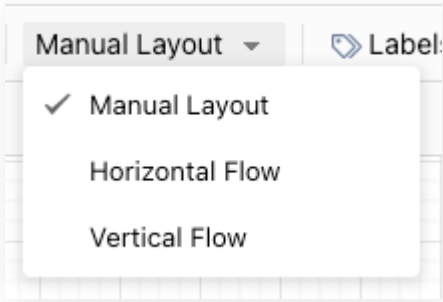
Next-Generation Diagram Editor is generally available!



1. Drill-Downs behave differently.



2. Existing Data Flows switch to manual mode.



Our AI Vision: Support AI usage in your business

LeanIX

1. AI in **Enterprise Architecture (EA)** → Capturing AI Systems & Use Cases
   - AI Governance, e.g., obligations to EU & US AI act
   - Possible Meta Model extensions

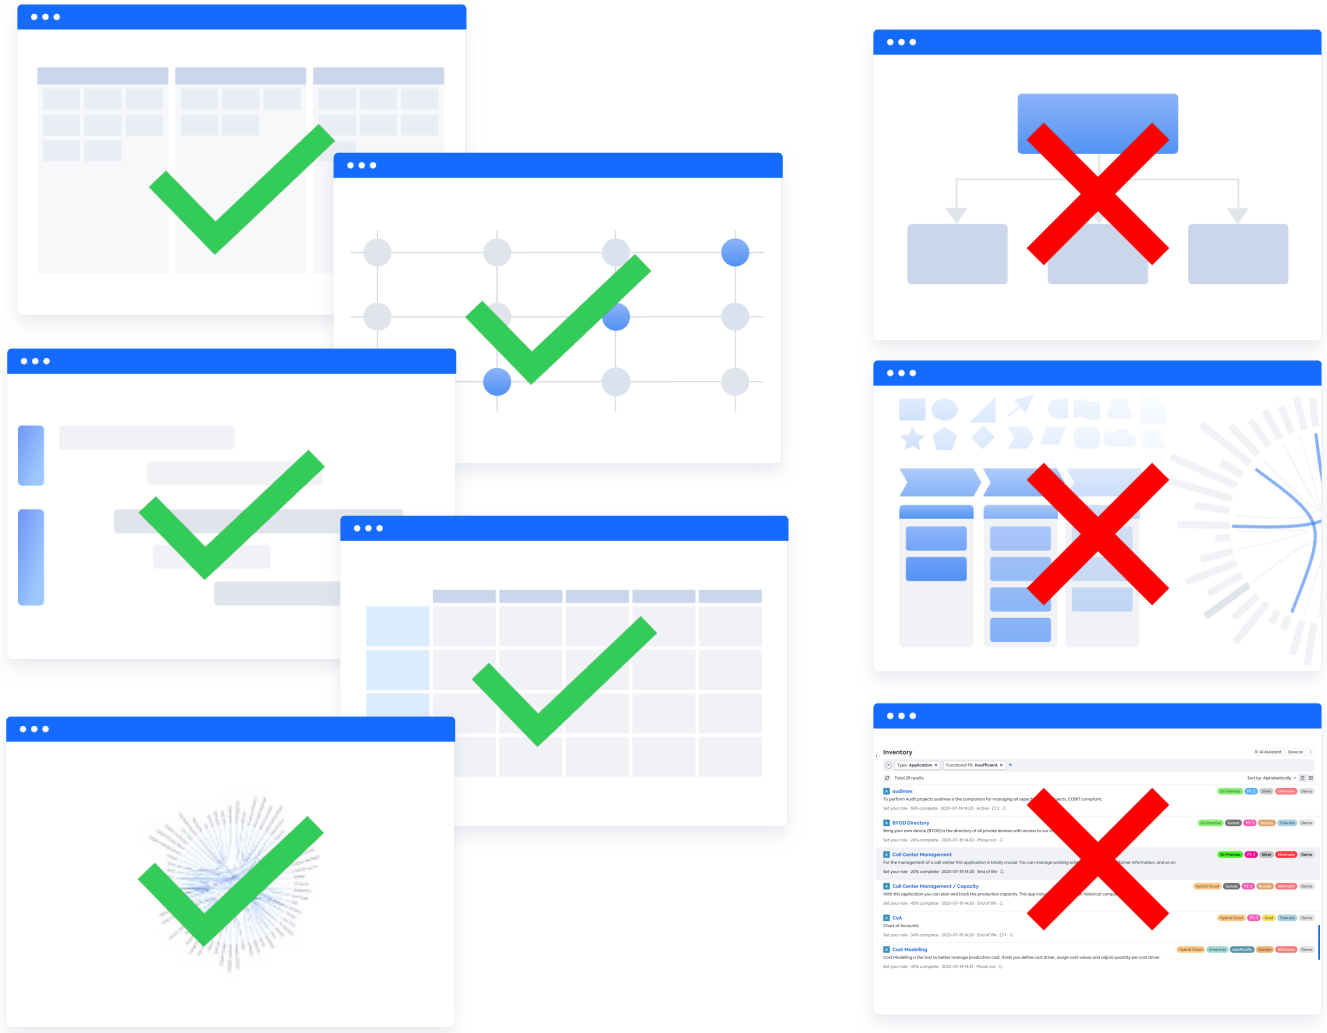
2. AI in **Enterprise Architecture Management (EAM)** → LeanIX AI Assistant
   - Just moved from reports into the inventory

   - Planned to partially move into the UI of Fact Sheets
   - Considering training a large language model with best practice and meta model data

Overview unified graphQL API

LeanIX

Reports supports OR filters



"OR" Operator **not yet** supported:

- Diagrams
- Inventory
- Other reports, i.e.,
  - World-Map
  - Business Capability Cost & Provider Cost

Part of our unified GraphQL initiative and blocker for further improvements, i.e.,

- numeric filters
- other sort orders
- better full text search.
- ...

Excel Import/Export

LeanIX

High number of feedback on Diagrams

Versioning of Diagrams	413
Inventory: Configure calculated fields (voted #2 in Q1)	301
Diagrams: Configurable shape libraries for Fact Sheet types (voted #12 in Q1)	196
[EAM] Inventory: Configurable Fact Sheet request form	189
Inventory: Improved management of resources at Fact Sheets (voted #14 in Q1)	181
Inventory: Extend table view to attributes on related Fact Sheet types (voted #7 in Q1)	155
Trigger Automation on Fact Sheet field changes	153
Inventory: Filter by dates and numeric fields	142
Archimate shape set linked to Fact Sheet types	137
Allow Non-Admins Users To Create/Run Surveys (voted #41 in Q4 2021)	126

Following the Next-Generation Diagrams release, we can start picking these in the upcoming quarters.
